

Starlinger is a pioneer for machines and process technology in the international circular economy for plastic packaging solutions. We are convinced of our mission, we accept professional and personal challenges and believe in the quality, necessity and positive impact of our work. Our innvoative achievements give us security and stability for further great ideas and the opportunity to make our company fit for the future.

To strengthen our team in Weissenbach an der Triesting we are looking for

CAD Design Engineer (m/f/d)

Your Contribution

As a CAD Design Engineer (m/f/d), you are the architect of the future! You bring ideas to life and shape groundbreaking products. You are the creative engine behind the development of new technologies and products that will change our world. Your skills enable us to work more efficiently and push the boundaries of what is possible. Dive

That´s what your role is all about

- Developing modern, robust, and cost-optimized plastics and textile machinery.
- Creating 3D CAD design drafts, testing the results on-site directly with our R&D department, and receiving immediate feedback on your solutions.
- Generating and maintaining all relevant manufacturing documentation, especially workshop drawings and bills of materials (BOM) in the ERP system, as well as the plant overview for the respective machine family.

into a world full of challenges and opportunities where you can shape the future. Become part of a dynamic team in Weissenbach, where creativity and technical expertise meet, and be a driving force for innovation and progress.

- Assessing and documenting all technical records in accordance with the Machinery Directive (MRL), with a particular focus on potential risks, in close cooperation with the documentation department.
- Collaborating closely with our electrical engineering, application engineering, and product management teams to find new paths and creative solutions.
- Advising our sales team on technical matters on an occasional basis.

You can utilise these skills

- You have a completed degree in a technical field or a higher technical college (HTL) qualification in mechanical engineering.
- You have at least 2 years of design experience with 3D CAD – if you bring more experience, even better!
- Communication in German and English (written and spoken) comes easily to you.
- You work with a strong attention to detail and truly thrive on solving technical problems.

We can prepare this offer for you

- A varied and challenging position in an international, fast-growing, and innovative industry.
- Strong teamwork to achieve our ambitious goals together.
- Exposure to various disciplines of mechanical engineering with opportunities to specialize.
- Company events and team-building activities.
- A share in the company's success.
- Flexible working hours / currently 1 day of working from home per week after the onboarding period.

For legal reasons, we would like to point out that the collective agreement is approx. Euro 3.400 gross/month. Based on qualifications and existing previous exeperience we will pay on market level.

Become part of our team and shape the future together with us!
