

Starlinger is a pioneer for machines and process technology in the international circular economy for plastic packaging solutions. We are convinced of our mission, we accept professional and personal challenges and believe in the quality, necessity and positive impact of our work. Our innovative achievements give us security and stability for further great ideas and the opportunity to make our company fit for the future.

To strengthen our team in Weissenbach an der Triesting we are looking for

Process Engineer Plastics Recycling (m/f/d)

Your Contribution

As a Process Engineer (m/w/f), you will play a key role in the development of modern recycling technologies. You will build prototypes, refine them in a targeted manner and support new developments at our customer's sites right through to market

That's what your role is all about

- You optimise all process parameters to ensure that customer requirements are met precisely.
- You oversee the installation of new generations of machinery right through to the point where they are ready for final operation.
- You carry out trial runs both in-house at our sites and on-site at the customer's premises (in some cases using

readiness. With your technical eye for detail, you will ensure smooth, continuous operation of the plants. If you would like to apply your experience in a pragmatic and goal-oriented way, we look forward to receiving your application.

material provided by the customer).

- By monitoring production and formulating recommendations for production planning, you ensure risk-free continuous operation.
- To ensure that live-production runs smoothly on site, you will train our customer's staff on site.
- As the direct point of contact for management, you will communicate knowledgeably and on equal footing regarding the performance capabilities and limitations of each system.
- Through online support, you will assist our technicians during service calls.

You can utilise these skills

- You have at least a completed apprenticeship as a plastics technician, ideally a qualification of a Higher Technical College in plastics technology.
- You already have a 3-5 years' relevant experience working with thermoplastics, ideally in the field of plastics recycling. Knowledge of mechanics and electrical systems is an advantage.
- You are a communicative person who work in a customer- and solution-oriented manner.
- Your love of travel is reflected in your confidence when dealing with different cultures.
- Your German (C2) is business fluent and your English (B2) is good, both spoken and written.

We can prepare this offer for you

- A varied position in an international company, in an interesting, rapidly growing and innovative field
- A committed and dynamic team
- Company events
- Participation in the company's success

The basic salary for this role, as set out in the collective agreement, is approx. Euro 3.000,-- gross per month. For candidates with the appropriate qualifications and professional experience, we offer overpayment in line with market rates.

Become part of our team and shape the future together with us!
